Syncrometer Tests (Saliva tests, product tests...)

General Information regarding testing saliva, products, water and dust:

The saliva test is a way to be tested using Dr. Hulda R. Clark's Syncrometer .

The Syncrometer is an electronic circuit that scans for pathogens, ,toxins, pollutants etc. in the body, in the environment, in the food, in body-care products, etc. This detective device was developed by Dr. H. Clark and is more sensitive and versatile than other available laboratory methods.

Testing involves heavy metals, environmental toxins, fungi, bacteria, parasites and solvents.

Use **exclusively** a small transparent glass bottle of the size of approx. 0.60" x 1.50" sealed with a plastic cap. Wash out the bottle with very hot water. (You can find these bottles in a pharmacy or drugstore).

Fill the bottle that you will receive with one fourth of your saliva. Once sealed, wash the bottle very well under running water and put it in a small plastic bag. Put the description of your health condition in an envelope and send it together with the saliva sample.

You can also have your tap water tested. Take a small glass bottle and fill with about 2 teaspoons of your tap water taken in the morning as soon as you turn on your faucet.

Should you wish to have your products or dust tested, put dry products in a small plastic bag with description written on label attached to it. Liquid products need to be stored in a glass bottle as described for the saliva test.

You will receive an analysis of your saliva-test in writing. (only in German or English)

TEST 1/SHORT TEST**CHF 120.00 / US\$ 120.00 / Euro 80.00****Testing for:**

Heavy metals
Environmental toxins
Bacteria
Fungus
Dyes

Viruses
Parasites (flukes etc.)
Tapeworm
Solvents
Malonic acid

>>**without** identification of organs. It is less detailed than Test 2

TEST 2**CHF 220.00 / US\$ 220.00 / Euro 150.00****Testing for:**

Heavy metals
Environmental toxins
Bacteria
Fungus
Dyes

Viruses
Parasites (flukes etc.)
Tapeworms
Solvents
Malonic acid

>>**without** identification of organs. It is more detailed than Test 1.

TEST 3**CHF 380.00 / US\$ 380.00 / Euro 255.00**

(Recommended for chronic illnesses)

Testing for:

Heavy Metals
Environmental toxins
Bacteria
Fungus
Dyes

Viruses
Parasites
Tapeworms
Solvents
Malonic Acid

>>**with** identification of organs

TEST 4/FLOWSHEET**CHF 990.00 / US\$ 990.00 / Euro 690.00**

(Recommended for cancer/tumor patients)

This test is based on the newest information in Dr. Clark's most recent book: „The Prevention of all Cancers“ page 274.
It is a very elaborate and extensive test.

The price of this test will be deducted from our intensive program, should you decide to undergo this program within a month's time.

TEST 5/THERAPY PROGRAM CHF 240.00/US\$ 240.00/Euro 160.00

Individual therapy program as per the results of your saliva test according to the indications described by Dr. Hulda Clark in her books:

Dr. Clark's cleanses and health improvement programs (parasite cleanse, kidney cleanse, liver flush, bowel program, etc.)

Dental clean-up (as needed) Environmental clean-up (as needed)

Dietary program

Chelating heavy metals and environmental toxins

Ausleitungsprogramme nach Dr. Hulda R. Clark

>>This program is especially well-suited for patients with chronic illnesses and **not** for cancer patients.

TEST 6 CHF 50.00 / US\$ 50.00 / Euro 35.00

Test your drinking water:

Your drinking water will be tested for 14 heavy metals and pollutants.

TEST 7 CHF 50.00 / US\$ 50.00 / Euro 35.00

Dust test:

Your dust will be tested for 12 different heavy metals, fungus and pollutants.

TEST 8

Product Test:

Your product will be tested according to your wishes. Please check the separate information sheet (www.sanavital.ch).

Please Inform us of the test you have chosen and in which language you wish to receive the results (only English or German)

>>> The results of your test will be sent to you by post, email or fax only after receipt of payment.
